CATALOG OF SELECTED Charts AVAILABLE FROM U.S.D.A.

PREFACE

This catalog presents a selection of charts available from the United States Department of Agriculture. Those included were chosen because they are suitable for general purposes and are of continuing usefulness.

Charts in this catalog are grouped by subject matter. To find the charts on a particular subject, consult the table of contents on page 4, then look through the pages indicated.

Whenever possible, these charts will be kept current. In other words, the lines, bars, or other symbols will be extended as new data become available. Titles, negative numbers and the general appearance of the charts will be as shown in this catalog. Up-to-date charts will be used in filling orders for prints, slides, and photostats.

Charts based on continuing statistical series will show data for the last year for which there are firm estimates. Those based on the decennial census or the census of agriculture will be up-dated when new census data are available. Some charts based on special surveys or studies cannot be kept current, but are included because they show the latest information.

Many other charts that have been carried in various publications of the Department also are available. Particularly useful sources, especially of new charts, are "Agricultural Outlook Charts" published each fall by the Agricultural Marketing Service and the Agricultural Research Service, and the annual Chartbook of the Foreign Agricultural Service. All charts that carry a negative number, whether or not they are included in this catalog, should be ordered according to the instructions on page 3.

Beneath each chart in this catalog is a note that shows the source of the data used in making the chart. This is for the convenience of those who may wish to consult the statistics on which the charts are based.

Agencies which prepared charts shown in this catalog are: Agricultural Marketing Service, Agricultural Research Service, Foreign Agricultural Service, Farmer Cooperative Service, Forest Service, and the Rural Electrification Administration.

June 1959

HOW TO ORDER CHARTS AND MAPS

1. List negative number, title and size. Specify dull or glossy finish. The negative number is printed in the lower part of each chart. It usually is preceded by the initials of the originating agency. For example, AMS 3647 is the negative number of the first chart in this book.

2. Give name and address of individual to whom the charts should be sent.

3. Orders must be accompanied by a remittance. A purchase order will be accepted from State institutions.

4. Make all remittances to the Office of Information, USDA.

5. Send orders and remittances to the Photography Division, Office of Information, USDA, Washington 25, D. C.
